1. What does it mean to “fork” a blockchain?

1 / 1 point

- ☒ To change the protocol or consensus rules of the blockchain
- ☐ To create multiple identities on the blockchain
- ☐ To increase the number of nodes in the network
- ☐ To use a third party to verify whether a token has already been spent

✓ **Correct**

In 2014, following an attack on the MintPal exchange, VeriCoin developers forked the VeriCoin blockchain—essentially rolling back time prior to the attack in order to recover the lost funds.
