1. What are some of the limitations of the Internet for business and economic activity? Select all that apply.

1 / 1 point

☒ Intermediaries are needed to establish our real identities.

Correct

We still need intermediaries like banks or government agencies to establish our identities or give each other money online.

☒ Centralized control of our data threatens our privacy.

Correct

Corporations and governments can learn almost everything about us from only a handful of companies.

☒ The growth of online commerce creates more opportunities for cyber-crime.

Correct

Moore's law, the doubling of processing power every year, also doubles the power of fraudsters and thieves - not to mention spammers, phishers, data kidnappers, and cyberbullies.

☐ The Internet reduces the costs of searching, collaborating, and exchanging information.

2. What is one reason why the Internet has experienced some of these limitations?

1 / 1 point

☒ The Internet was supposed to be a shared, global resource, but is now controlled by a few large companies.

☐ The cost of computing has been increasing over the past four decades.

☐ The barriers of entry for new digital ventures are too high.

☐ Technology always destroys privacy.

Correct

Large companies maintain the Internet's infrastructure, write its algorithms and apps, and extract a massive amount of data from users.
