1. What does it mean for a software agent to be "autonomous?"   `1 / 1 point`

   ○ That it can attach names to otherwise anonymous data

   ⦿ That it can operate without direct human control

   ○ That it is controlled by malicious human agents (e.g. hackers)

   ○ That it can hold operations for ransom, until human owners paid up

   ✓ **Correct**
   Autonomous agents use intelligent software to manage and organize resources and processes without direct human intervention.
